FANFARO TSV 5W-40 6509

Innovative universal hydro-synthetic (HC-synthesis) engine oil with increased viscosity for modern turbocharged and non-turbocharged petrol and diesel engines with direct and multipoint injection. Contains synthetic esters. Developed based on the requirements of European manufacturers.

Product properties:

- Ester-technology and the hydrosynthetic base with an optimal range of viscosity-temperature properties ensure efficient engine operation in all operating modes (cold start, city mode, highway mode) and under conditions of frequent temperature changes as well as increased loads;
- The hydrosynthetic ester-containing base combined with an advanced additive package maintains the engine performance parameters throughout the entire oil change interval;
- The ester oil components provide excellent anti-wear and anti-friction properties thanks to the exceptional strength of the oil film, which, combined with excellent pumpability, significantly extends engine life even in "start-stop" and cold-start conditions;
- Saves fuel thanks to excellent antifriction properties;
- Resists ageing effectively thanks to its high thermo-oxidative stability;
- Thanks to its excellent detergent-dispersing properties and maximum thermal-oxidising stability, it effectively prevents all types of deposits and keeps engine parts clean throughout the entire oil change interval.

Designed for petrol and diesel engines of a wide range of vehicles (passenger cars, light SUVs, vans and light trucks) of European and other manufacturers.

Recommended for FORD diesel engines, except for Ford Ka TDCi and Ford Galaxy 1.9 TDi produced in 2000-2006, as well as for use in engines of Daimler and VW vehicles with additional requirements for engine oils (according to the above specifications).

Recommendation:
